

SERVICE-BUSINESS RECEIVABLES

Invoice Follow-Up Audit

Five invoice histories. One blocker map. Delivered in 3 business days.

FIXED PAID STEP

\$500

Use this audit when invoices are technically sent, but payment still depends on the founder deciding who follows up, when the tone changes, and what happens after a broken promise.

What we review

- **Five anonymized invoice histories**
Dates, amounts, reminders, replies, disputes, and payment outcome.
- **Current commercial rules**
Terms, deposits, milestones, late-payment policy, and delivery gates.
- **Existing tools and messages**
Accounting platform, reminders, templates, email, SMS, or WhatsApp.
- **Ownership and exceptions**
Who acts today, strategic-account exceptions, and escalation boundaries.

What you receive

- **Blocker map**
Why each invoice stalled: readiness, approval, ownership, promise, or escalation.
- **Invoice-readiness gate**
The evidence and approvals that must exist before an invoice is issued.
- **Follow-up operating sequence**
Stages, timing, owner, promise-to-pay tracking, and stop-work trigger.
- **Implementation recommendation**
What to keep, change, or automate around the tools already in use.

HOW THE PAID STEP WORKS

01

Share the evidence

Send five anonymized histories plus current terms and reminder examples.

02

We map the stalls

Each delay is classified and converted into a visible operating rule.

03

Review the decision

Receive the findings and choose whether a seven-day setup is justified.

Commercial terms

FEE

\$500

TURNAROUND

3 business days

CREDIT

100% for 30 days

SETTLEMENT

Crypto first

Ready to reserve the audit?

Choose the service and preferred asset. No automatic charge; scope and network are confirmed first.
